

From Jet's Mom:

“We are very grateful for the early detection of my son, Jett's, vision problem. The Louisiana Eye Foundation Cubsight Program recognized that Jett was struggling and recommended he be seen by a local eye specialist. Prior to seeing Dr. Gueldner, Jett wanted nothing to do with reading his sight words or practicing his letters. We had no idea the problem was due to his extremely poor vision. Since Jett has been wearing his glasses, reading sight words and practicing letters is no longer a battle! We truly believe the early detection of Jett's vision problem has made all the difference. Thank you so much to all of the volunteers at the LEFC Program for taking your time to help children!”
