

**From Lainey's Mom:**

**“I am so glad the CubSight Vision Screening came to my daughters school to perform vision screens. Lainey had started complaining of almost daily headaches, and it wasn't until right about the time the CubSight Program came to her school that I realized the headaches may be due to her vision. When she referred on her vision screen, I was quick to make a ophthalmologist appointment where we found out that she indeed needed glasses. Because of the program recognizing Lainey's impairment, she is now headache free and reports she can see the board in her classroom much better!”**
